STEP 1 Mid FEB & Late MAR

Provides pre-emergent control of Crabgrass and control or suppression of other listed weeds when applied prior to germination and emergence. Can be applied up to 4 weeks later than other pre-emergent Crabgrass preventers.

STEP 2 Mid - Late MAY

This formulation includes slow release Nitrogen for long lasting results plus high Iron content along with other trace elements to produce super greening power.

STEP 3 JUN

Provides slow release Nitrogen, high Iron content and post-emergent broadleaf weed control. For best results, apply to pre-moistened grass or early morning dew.
Do not water for 24 hours following application.

STEP 4 Mid AUG

This formulation includes slow release Nitrogen for long lasting results plus high Iron content along with other trace elements to produce super greening power.

STEP 5 SEP - OCT

An excellent source of Potassium, which helps plants form healthy stems, roots and tuber growth. Great for below ground forming vegetables such as Potatoes, Carrots and others.

STEP 6 DEC

Controls both emerged weeds and weeds from seed in St. Augustine and Centipedegrass including Henbit, Moneywort, Pennywort (Dollarweed), Chickweed (Common and Mouseear), Spurge, Annual Bluegrass (Poa Annua), Dichondra, Knotweed, Cudweed, Florida Betony, Lespedeza, Mustards, Narrowleaf Vetch, Parsley-Piert, Sandspur, Smutgrass, Spurweed, Swinecrest, Woodsorrel and various annual Clovers.
